Orion Bloomfield

Software Engineer and Student Researcher

obloomfield.com | github | orion@brown.edu | (609)-651-3314

Education

Brown University   Providence, RI
- *Bachelor of Science in Computer Science*   *Sep. 2020 - May 2024*
  Concurrent Masters of Science in Computer Science   **GPA**: 3.93/4
  > **Related Coursework**: Accelerated Intro to CS, Deep Learning, Graduate Computer Graphics, Software Engineering, Computational Molecular Bio., Recent Applications of Probability and Statistics, Honors Linear Algebra

Experience

- **Microsoft**   Redmond, WA
  Software Engineering Intern - Azure Data Usage Billing Team   *June 2022 - August 2022*
  > Created a **vscode extension** from scratch, utilizing **language modeling** to generate code actions that will elevate **customer experience** for an upcoming **Azure IaaS** product.
  > Implemented code completion, navigation, and error handling in a **C# backend service**, communicating to the client as well as other Azure **microservices** through a JSON-RPC language server protocol
- **Brown University**   Providence, RI
  Research Assistant - Dr. Rubenstein Theoretical Chemistry Group   *May 2022 - August 2022*
  > Building a webapp to host and support queries to a curated dataset of **protein-peptide interaction** pairs
  > Implementing interactive viewers for **3D structure**, sequence, and markov model dynamics data.
  > Outfitting public **RESTful API** hooks as well as database filtering and downloading to help researchers search, curate, and collect data scrutinizing any parameter
- **Care New England**   Providence, RI
  Research Assistant - Dr. Uzun's Genomics and Machine Intelligence Lab   *August 2021 - June 2022*
  > Developed an interactive **React** application that generates **multi-layer graph networks** from **protein interactomes**.
  > Implemented **caching** and **multi-threading** to optimize **Java** server host, reducing computation time by over **75%**
  > Innovated and ported over CLI services actively used by **hundreds** of researchers.

Teaching

Teaching Assistant - *Introduction to Software Engineering:* *Spring 2023 -* Hold weekly office hours, provide regular mentor check-ups for project group. Develop novel course assignments and features using a **Java Spark + Typescript + React** full-stack.

Teaching Assistant - *Accelerating Chemical Discovery:* *Spring 2023 -* Primary developer of new course content - involving autograding support through **otter-grader**. Hold weekly office hours and check-ins with students - supporting the learning process of challenging applications of **sklearn, deepChem, tensorflow**, for students with no prior coding experience.

Projects

desktop-world: *Fall 2022 -* **Three.js** webapp displaying a **procedurally-generated** terrain in a bowl. Using primarily **custom GPU shaders** in **OpenGL** for better performance, implements selective bloom, particle systems, and boids.

pep-BARD: *Summer 2022 - Present -* **Express.js** webhost of a curated dataset of high-fidelity protein-peptide interaction pairs. Using **React** with **THREE.js** to display custom alignment **3D protein models** along additional markov state dynamics modeling

Proteinarium: *Fall 2021 - Present -* **React** webapp built from the ground up with **D3.js** to visualize **graph clustering** algorithms on **protein interactome** data. Configured host of **Red Hat Linux** to scale, cache, and distribute **Java** backend services evenly.

CounterPointer: *Spring 2021 -* Classical counterpoint checker and generator service for **music theory** students. Designed and implemented **React** frontend with **Typescript** object modeling for music notation.

peaCTF: *Summer 2019, 2020 -* Founded **capture-the-flag** style web competition for aspiring **Cybersecurity** students. Attended by over **2,000** high school participants across the globe. Designed and implemented **React** frontend. Led problem design team.

Leadership

Brown Puzzle Club - *Founder*: *August 2021 - Present -* Leading a small team to design and test **competitive word/logic puzzles** for upcoming online events. Run **scavenger hunts**, **escape rooms** for Brown student events. Amongst Brown alumni, **placed 7th out of 393 teams** in the *2022 MIT Mystery Hunt*.

The Higher Keys - *Business Manager*: *August 2021 - Present -* Brown's **oldest** all-gender acapella group. Coordinate and plan **local performances**, with some events amassing over a **third** of the Brown student body. Network and contract **professional gigs**, touring yearly across the United States. Handle **funding** and **reimbursements**.

Skills

Languages and Technology: Java, C#, Javascript, Typescript, Python, React, Node.js, Golang, C++, Machine Learning, Tensorflow, Numpy, SQL, Docker, Git, Decentralized Networks, DeFi, Cryptography, Cybersecurity, Unit Testing
Scientific: Proteomics, PCR and iPCR Protocols, IHC Staining and Spectroscopy, BLAST Analysis, Gel Electrophoresis
Design: Figma, LaTeX, Adobe Photoshop, Adobe Premiere, Adobe InDesign
Miscellaneous: AGILE, Puzzle Competitons, Teaching and Tutoring, Choral Signing
